The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 9-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Watkins.

See col. 6, lines 18-43 where a tee or y-type fitting is taught upstream of a pressure regulator 52 via a check valve and a third hose so that the pressure regulator may be connected to both the water tank 42 and an external pressurized water source. The valve here allows an external source of supply or an internal source. Lacking here is routing the external source through the pump. To do so would have been considered an obvious matter of choice in design depending merely on the pressure at the external source i.e. if this pressure is sufficient for the needs, no pump operation is necessary. This is clearly the case here in that Watkins routes his external source through a pressure regulator 52. There simply is no need to employ the pump when the pressure is sufficient.

Claims 12-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Watkins as applied to claim 9 above, and further in view of Maddux.

Maddux teaches a portable sink 40 having a water heater 80 receiving water via a T 220 from a pump 112.

It would have been obvious to provide Watkins with this perfecting scheme as same is shown to be known in an identical art device.

Any inquiry concerning this communication should be directed to Charles Phillips at telephone number (571) 272-4893.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
